# Moments of Calm

Fixtures from ADO Lights bring a sense of calm in the heart of Dijon, illuminating the Cour Bareuzai area.

**C**our Bareuzai is situated in the heart of Dijon. It is an ensemble of carefully renovated courtyards and mansions from the 17th and 18th centuries, in which Chapman Taylor created 2,300sqm of spaces for retail, catering and offices. The architects also brought a little greenery into the city centre with their ideas. From a turbulent and busy street you enter a quiet courtyard through a passage designed with plant walls, illuminated with ADO Lights' LED-Hayat fixtures. The luminaires have been equipped with lamps that support and facilitate growth.

An LED-Voute in combination with an LED-LightLine illuminates the way for passersby travelling to the next courtyard. Light lines integrated into the floor can also be found, which elegantly enhance the contrast between the old building and modern architecture. ADO Lights' LED-Drainlight with wall washers have also been integrated into façade drainage channels, which let the walls of the mansions shine in the courtyard, creating an additional atmosphere. ■ [www.ado-lights.com](http://www.ado-lights.com)

.....

Individual LED solutions – for interior and exterior matching the architecture

above: LED-LIGHTLINE – for accent lighting and wayfinding

Straight and curved – following your design
